PROJECTS

FrontEndCapstone

ReBootKamp

📅 February 2021

📍 RBK

- Worked in a team of four
- worked with SCRUM methodology as a developer
- Mimicked a single page details of Amazon
- Worked on the related products cards and items module
- Interacted with provided APIs
- Used proxy to link multiple servers
- Helped in deployment using Digital Ocean
- Technologies used: React and Nodejs

Thesis Project: GaryWork

ReBootKamp

📅 April 2021

📍 RBK Tunis

- Worked in a team of four
- Created a platform providing clients with multiple services related to house needs. It also helps service providers gain more clients.
- Worked in the service list section and helped in the admin side
- Implemented all CRUD operations.
- Enabled image uploads with Cloudinary.
- Used different technologies such as Angular for Front-end, Nodejs Express for Back-end, and Mongo Atlas for database.
